

Investor Presentation

| FEBRUARY 2025

Important notices

Of the Mineral Resources scheduled for extraction and recovery in the Etango-8 Definitive Feasibility Study (**DFS**) and Etango-XP / XT Scoping Study (**Scoping Study**), 100% are classified as Measured or Indicated. Bannerman Energy Ltd (**Bannerman**, the **Company**) confirms that there are no Inferred Resources included in the Etango-8 DFS or Etango-XP / XT Scoping Study production schedules.

The Mineral Resources underpinning the Ore Reserve and production target in the Etango-8 DFS (and the production target in the Etango-XP / XT Scoping Study) have been prepared by a competent person in accordance with the requirements of the JORC Code (2012). The Competent Person's Statement is found overleaf. For full details of the Mineral Resource estimate, please refer to the ASX release dated 6 December 2022, "Etango-8 Definitive Feasibility Study". Bannerman confirms that it is not aware of any new information or data that materially affects the Mineral Resource estimate included in that release. All material assumptions and technical parameters underpinning the Mineral Resource estimate in that ASX release continue to apply and have not materially changed.

This release contains a series of forward-looking statements. Generally, the words "expect," "potential", "intend," "estimate," "will" and similar expressions identify forward-looking statements. By their very nature forward-looking statements are subject to known and unknown risks and uncertainties that may cause our actual results, performance or achievements, to differ materially from those expressed or implied in any of our forward-looking statements, which are not guarantees of future performance. Statements in this release regarding Bannerman's business or proposed business, which are not historical facts, are forward-looking statements that involve risks and uncertainties, such as Mineral Resource estimates, Ore Reserve estimates, market prices of metals, capital and operating costs, changes in project parameters as plans continue to be evaluated, continued availability of capital and financing and general economic, market or business conditions, and statements that describe Bannerman's future plans, objectives or goals, including words to the effect that Bannerman or management expects a stated condition or result to occur. Forward-looking statements are necessarily based on estimates and assumptions that, while considered reasonable by Bannerman, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies. Since forward-looking statements address future events and conditions, by their very nature, they involve inherent risks and uncertainties. Actual results in each case could differ materially from those currently anticipated in such statements. Investors are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date they are made.

Bannerman has concluded that it has a reasonable basis for providing these forward-looking statements and the forecast information included in this ASX release. This includes a reasonable basis to expect that it will be able to fund the development of Etango upon successful delivery of key development milestones as and when required. The detailed reasons for these conclusions are outlined in the ASX release dated 6 December 2022, "Etango-8 Definitive Feasibility Study", in the section titled, "Funding pathway". While Bannerman considers all of the material assumptions to be based on reasonable grounds, there is no certainty that they will prove to be correct or that the range of outcomes indicated by the DFS will be achieved.

To achieve the range of outcomes indicated in the DFS, pre-production funding in excess of US\$353M will likely be required. There is no certainty that Bannerman will be able to source that amount of funding when required. It is also possible that such funding may only be available on terms that may be dilutive to or otherwise affect the value of Bannerman's shares. It is also possible that Bannerman could pursue other value realisation strategies such as a sale, partial sale or joint venture of the Etango Project. These could materially reduce Bannerman's proportionate ownership of the Etango Project.

For full details of the Etango-8 DFS and Etango-XP / XT Scoping Study, please refer to ASX releases dated 6 December 2022, "Etango-8 Definitive-Feasibility Study" and 18 March 2024, "Etango-XP and Etango-XT Scoping Study". In addition, please refer to ASX release dated 11 June 2024, "Etango-8 FEED Complete and Costs Updated; Detailed Design Commenced". Other than the updated capital and operating costs expressed in the 11 June 2024 release, Bannerman confirms that it is not aware of any new information or data that materially affects the information included in the releases of 6 December 2022 and 18 March 2024. All material assumptions and technical parameters underpinning the estimates in those ASX releases continue to apply and have not materially changed.

Important notices

Forward Looking Statements

This presentation includes various forward looking statements which are identified by the use of forward looking words such as “may”, “could”, “will”, “expect”, “believes”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs. Statements other than statements of historical fact may be forward looking statements. Bannerman believes that it has reasonable grounds for making all statements relating to future matters attributed to it in this presentation.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of resources or reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation. Investors should note that any reference to past performance is not intended to be, nor should it be, relied upon as a guide to any future performance.

Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company’s control.

Although the Company attempts to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Actual results, values, performance or achievements may differ materially from results, values, performance or achievements expressed or implied in any forward looking statement. None of Bannerman, its officers or any of its advisors make any representation or warranty (express or implied) as to the accuracy or likelihood of fulfilment of any forward looking statement, or any results, values, performance or achievements expressed or implied in any forward looking statement except to the extent required by law.

Forward looking statements in this release are given as at the date of issue only. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

Competent Person Statement

Mineral Resources

The information in this release relating to the Mineral Resources (November 2021) of the Etango Project is based on a resource estimate compiled or reviewed by Mr Ian Glacken, Principal Consultant at Snowden Optiro Pty Ltd and a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Glacken has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”, is an independent consultant to Bannerman and a Qualified Person as defined by Canadian National Instrument 43-101. Mr Glacken consents, and provides corporate consent for Snowden Optiro Pty Ltd, to the inclusion in this release of the matters based on his information in the form and context in which it appears.

Ore Reserves

The information in this release relating to the Ore Reserves (June 2022) of the Etango-8 DFS Project is based on information compiled or reviewed by Mr Werner K Moeller, a Director since 2016 of Qubeka Mining Consultants CC based in Klein Windhoek, Namibia. Prior to 2016 Mr. Moeller was a Director of VBKom Consulting Engineers (Pty) Ltd based in Centurion, South Africa from 2008. Mr Moeller is a Member of The Australasian Institute of Mining and Metallurgy (MAusIMM nr. 329888), a Member of the South African Institute of Mining and Metallurgy (MSAIMM nr. 704793) and a Member of the Canadian Institute of Mining, Metallurgy and Petroleum (MCIM nr. 708163). He graduated from the University of Pretoria, South Africa and holds a Bachelor degree, majoring in Mine Engineering (2001) and an Honours degree, majoring in Industrial Engineering (2002). Mr Moeller is a practising mining engineer, having practiced his profession continuously since 2002, and has sufficient experience relevant to the style of mineralisation and types of deposits under consideration and to the activity which is being undertaken to qualify him as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. He has read and understood the requirements of the 2012 Edition of the Australasian Code for Reporting of Exploration Results and the Technical Report has been prepared in compliance with that code. Mr Moeller consents to the filing of this release with any stock exchange and other regulatory authority and any publication by them for regulatory purposes, including electronic publication in the public company files on their websites accessible by the public. Mr Moeller furthermore does not have nor does he expect to receive a direct or indirect interest in the Etango property of Bannerman, and he does not beneficially own, directly or indirectly, any securities of Bannerman or any associate or affiliate of such company. Mr Moeller consents to the inclusion in this release of the matters based on his information in the form and context in which it appears.

The leading next-generation uranium supplier of choice

Our flagship Etango Project is **one of the world's largest, most advanced** uranium development assets.

Benefiting from its **location in Namibia**, a highly established uranium production powerhouse.

Strongly de-risked through extensive drilling, technical evaluation and process demonstration plant.

Fully permitted with a **clear pathway to development**.

Readily positioned to capitalise on the unfolding uranium market recovery.

The **leading next-generation uranium** supplier of choice

- 1 Licence to operate in Namibia, a stable, highly established uranium jurisdiction
- 2 Skilled team with deep Namibian uranium operating and developing expertise
- 3 Fully permitted with all environmental approvals and Mining Licence in place
- 4 Strong technical and commercial viability demonstrated via Etango-8 DFS
- 5 Conventional production, technically de-risked through pilot-plant operation
- 6 Long track record of responsibility and sustainability
- 7 Delivering significant, lasting positive social and environmental impact

1. Licence to operate in Namibia, a stable, highly established uranium jurisdiction

- Recognised tier-one supplier to global utilities
- 45-years of uranium production and export
- Three large-scale uranium mines; Top 3 global producer
- Excellent infrastructure - port, rail and power
- Clear mining code and strong rule of law
- Strong community and social support for uranium

2. Experienced Board of Directors with extensive uranium operating & development experience

Brandon Munro
Executive Chairman & Managing Director

- 20+ years' transactional and financing experience as a corporate lawyer and resources executive
- Member of WNA Advisory Panel and former Chair of WNA Nuclear Fuel Demand Working Group
- Qualifications: LLB, B.Econ, GAICD, F Fin, GradDipAppFin SIA

Gavin Chamberlain
Chief Executive Officer

- 30+ years' mining project construction experience
- Previously the Project Director for construction of the Husab uranium mine (Namibia)
- Formerly COO of Kore Potash and Regional Director of Mining Africa for AMEC (now Wood plc)
- Qualifications: Pr Eng, BSc (Civil Eng), GDE, GAICD

Twapewa Kadhikwa
Chairperson (Namibia)

- High-profile Namibian businesswoman
- Respected SME advisor to government
- Qualifications: B. Com

Alison Terry *Lead Independent Non-Executive Director*

- Experience in sustainability, ESG dynamics, legal & corporate affairs and operations
- Former Director Sustainability & Corporate Affairs at Fortescue Metals Group
- Qualifications: B.Ec LLB (Hons), Grad Dip Bus. (Accounting), GAICD

Clive Jones
Non-Executive Director

- 30+ years in mineral exploration and founding/developing/transacting ASX companies
- One of the original vendors of the Etango project
- Qualifications: BAppSc (Geology), MAusIMM

Bruce McFadzean
Non-Executive Director

- 40+ years mining and process experience as a mining engineer
- 30 years' exposure to all levels of construction and operations, ranging in size from BHP and Rio Tinto to junior development companies
- 15 years as CEO of companies constructing and operating mines in Australia and Africa.
- Qualifications: Grad Dip Mining, FAusIMM

Mike Leech
Non-Executive Director

- 30+ years' mining industry experience at Rio Tinto
- Namibian uranium operating experience, former roles include MD and CFO at Rössing Uranium, and President of Namibian Chamber of Mines
- Qualifications: FCIS (Accountancy)

Felicity Gooding
Non-Executive Director

- 20 years' experience in senior finance and management roles within multinational and ASX-listed organisations
- ED & Group CFO of Lithium and Geothermal Energy developer, Vulcan Energy Resources
- Former CFO & Global Head of Commercial at Fortescue Future Industries (FFI), a subsidiary of Fortescue (ASX:FMG)
- Qualifications: BCom, FCA, GAICD, GradDipCA

2. Proven management team with deep in-country and uranium operating experience

Werner Ewald
Managing Director
(Namibia)

- 30+ years' experience in the uranium, diamond and coal mining industries
- Namibian born and based in Swakopmund
- Previously was the Mine Manager at the Rössing uranium mine (Namibia)
- Qualifications: BEng (Electrical), MBA

Steve Herlihy
Chief Financial Officer & Company Secretary

- 30+ years' experience as a chartered accountant
- Previous experience at BHP Iron Ore as global Financial Controller and Special Projects
- Deep M&A and project finance experience
- Qualifications: CA, CTA, MBA, BBus (Accounting), GradDipAppFin

Olga Skorlyakova
Vice President,
Market Strategy

- 25+ years' experience in international business development, sales and market strategy
- Held executive roles within the nuclear fuel sector with AREVA (now Orano) and TENEX
- Recently led the WNA Fuel Report Working Group
- Qualifications: MA (English), Exec. MBA

Matt Horgan
Vice President,
Corporate Development

- 14 years' experience working across technical, marketing, commercial, Investor relations, project development & corporate development/M&A.
- Recent and direct experience in African domiciled mineral assets
- Held executive & senior roles at Peak Rare Earths, Azure Capital & global aluminium major, Alcoa
- Qualifications: BE (Hons), MBA, GAICD, MAusIMM

Melvin Yeo
Chief Legal Counsel

- 25+ years' experience in various legal roles and is a company director
- Previous senior roles at Wesfarmers Limited and Corrs Chambers Westgarth
- Involved in numerous corporate transactions and co-founded multiple mineral exploration projects around the world.
- Qualifications: LLB (Hons), GradDipAppFin SIA

Jeff Pipe
Owner's Team
Project Manager

- 40+ years of project and construction management experience in Africa
- Worked in coal, gold, platinum and diamond mining with both surface and underground works
- Managing director of Archway Projects for 20 years
- Project director of SPD consulting
- Qualifications: ND, NHD, CivEng, MDB (Gibbs), Cert. in Arbitration (AoA)

Cindy Fraser
Owner's Team
Commercial Manager

- 30 years' experience in commercial, contract and supply chain areas of major mining projects
- Vast knowledge of developing & implementing project systems & procedures, along with contract management, procurement & logistics experience
- Southern African Experience

Andre Alberts
Owner's Team
Technical Manager
and Director of CREO

- 13+ years' experience in the mining industry, with an operational background in hydrometallurgy
- Currently leads a team of engineers as part of Creo's appointment for owner engineering services
- Previously worked at the Skorpion zinc refinery & Tschudi copper mine/heap leach (both in Namibia)
- Qualifications: BEng (Chemical)

3. Fully permitted with all environmental approvals and Mining Licence in place

Mining licence

- Etango Mining Licence awarded **December 2023**
- Early-stage works contracts commenced
- Maintains target construction schedule

Environmental licence

| CONSENT TYPE | DATE ACHIEVED | |
|---|------------------|---|
| ECC 01608 (Etango Project) | 5 July 2012 | ✓ |
| ECC 02193 (linear infrastructure) | 26 July 2011 | ✓ |
| ECC 01529 (HL demonstration plant) | 7 September 2014 | ✓ |
| ECC APP 3078 (permanent water pipeline) | 10 August 2022 | ✓ |
| ECC APP 3058 (electrical transmission line) | 23 August 2022 | ✓ |
| ECC 2300287 (temporary water pipeline) | 16 April 2023 | ✓ |

Strongly supported
By our local communities and the Namibian government

4. Strong technical and commercial viability demonstrated via Etango-8 DFS

- Conventional open pit mining and heap leach processing at 8Mtpa throughput
- Informed by vast body of previous technical work across resource drilling, geotechnical, metallurgical and environmental studies
- Cost estimates completed to +/-10% accuracy and current as at June 2024

15 years

Initial mine life

113.5 Mt

Total ore throughput

US\$353M

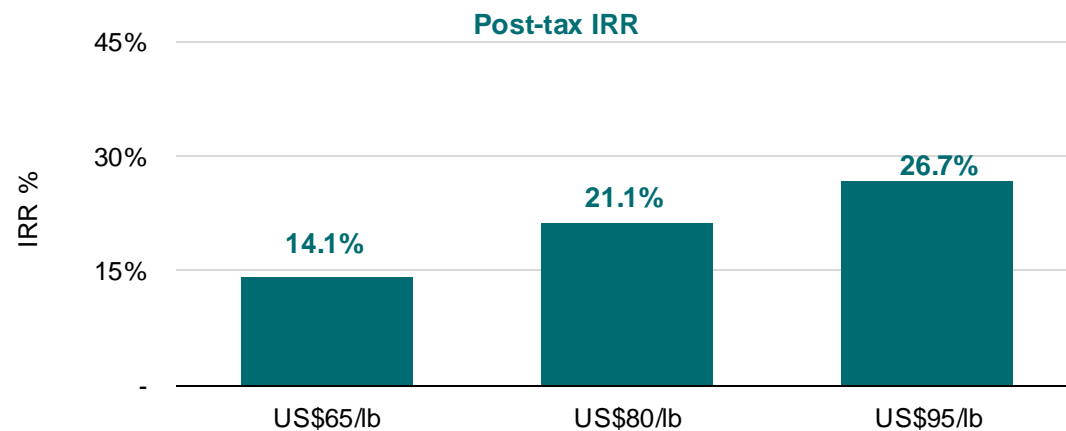

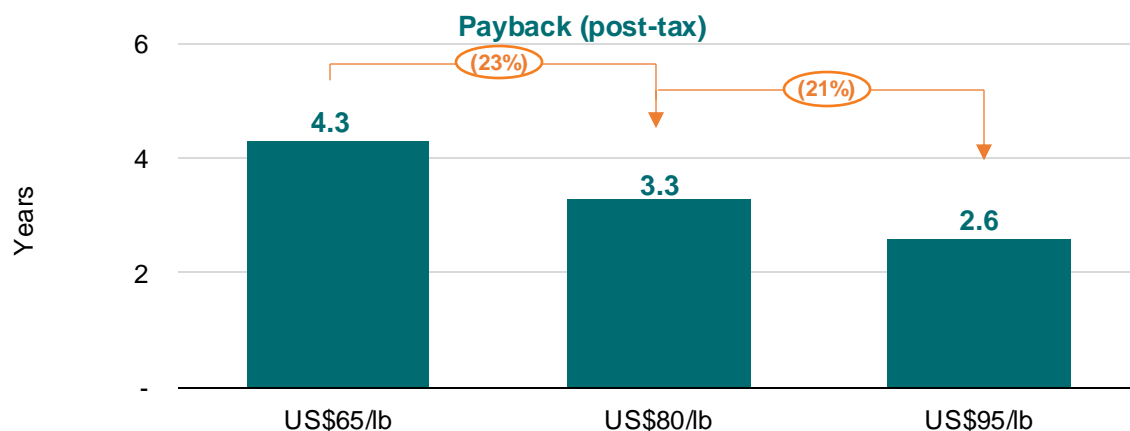

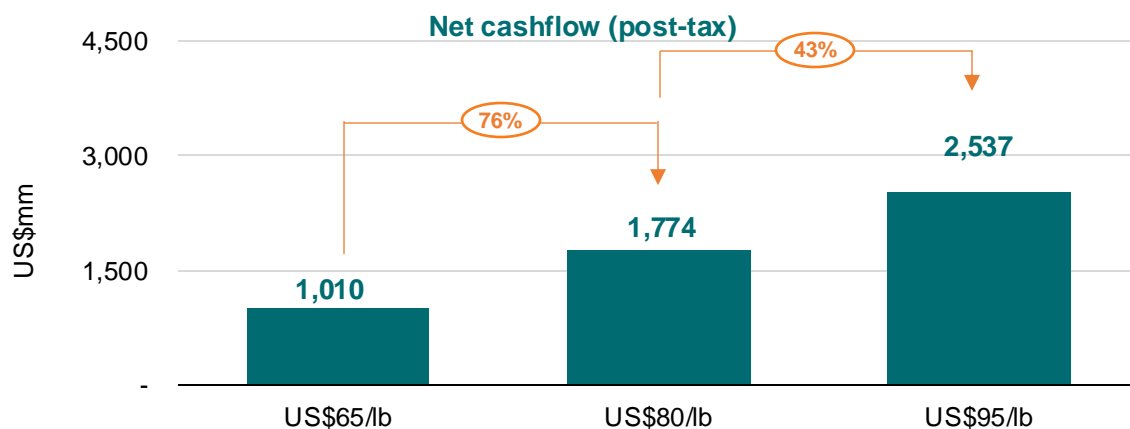

Pre-production capex¹

For full details of the Etango-8 DFS, please refer to ASX release dated 6 December 2022, "Etango-8 Definitive-Feasibility Study". In addition, please refer to ASX release dated 11 June 2024, "Etango-8 FEED Complete and Costs Updated; Detailed Design Commenced". Other than the updated capital and operating costs expressed in the 11 June 2024 release, Bannerman confirms that it is not aware of any new information or data that materially affects the information included in the 6 December 2022 release. All material assumptions and technical parameters underpinning the estimates in the 6 December 2022 release continue to apply and have not materially changed.

Note: ¹ Reflective of the updated cost estimates from the Control Budget Estimate contained in the ASX release dated 11 June 2024, "Etango-8 FEED Complete and Costs Updated; Detailed Design Commenced".

4. Outstanding Etango-8 upside price leverage

Incorporating completion of the Front-End Engineering and Design (FEED) and Control Budget Estimate (CBE) processes¹

For full details of the Etango-8 DFS, please refer to ASX release dated 6 December 2022, "Etango-8 Definitive-Feasibility Study". In addition, please refer to ASX release dated 11 June 2024, "Etango-8 FEED Complete and Costs Updated; Detailed Design Commenced". Other than the updated capital and operating costs expressed in the 11 June 2024 release, Bannerman confirms that it is not aware of any new information or data that materially affects the information included in the 6 December 2022 release. All material assumptions and technical parameters underpinning the estimates in the 6 December 2022 release continue to apply and have not materially changed.

Note: ¹ Reflective of the updated cost estimates from the Control Budget Estimate contained in the ASX release dated 11 June 2024, "Etango-8 FEED Complete and Costs Updated; Detailed Design Commenced".

4. Further in-ground leverage realisable via subsequent growth options

- World-class scale Etango deposit can deliver substantially higher value via scalability post ramp-up with higher uranium price outcomes, *market conditions permitting*
- Two future phase development options

→ **Etango-XP:** Mine and plant throughput expanded to 16 Mtpa (expansion capital US\$367M¹)

→ **Etango-XT:** Life extension with mine and plant throughput maintained at 8 Mtpa

ETANGO-XP

LOM U₃O₈ output

95.2Mlbs

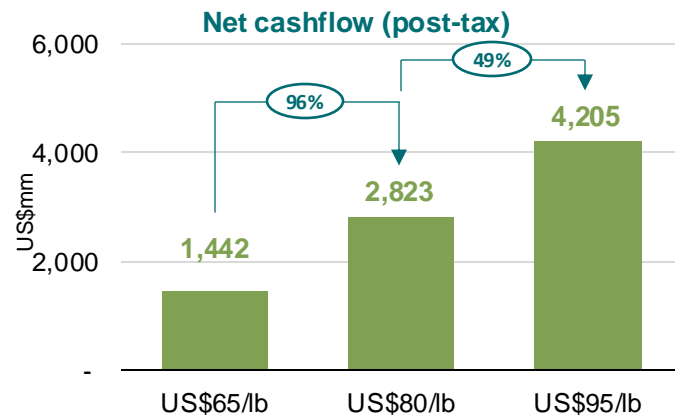

4. Further upside price leverage from Etango-XP / XT

Incorporating completion of the Front-End Engineering and Design (FEED) and Control Budget Estimate (CBE) processes¹

Etango-XP

Etango-XT

For full details of the Etango-XP and Etango-XT Scoping Study, please refer to ASX release dated 18 March 2024, "Etango-XP and Etango-XT Scoping Study". In addition, please refer to ASX release dated 11 June 2024, "Etango-8 FEED Complete and Costs Updated; Detailed Design Commenced". Other than the updated capital and operating costs expressed in the 11 June 2024 release, Bannerman confirms that it is not aware of any new information or data that materially affects the information included in the 18 March 2024 release. All material assumptions and technical parameters underpinning the estimates in the 18 March 2024 release continue to apply and have not materially changed.

Note: ¹ Reflective of the updated cost estimates from the Control Budget Estimate contained in the ASX release dated 11 June 2024, "Etango-8 FEED Complete and Costs Updated; Detailed Design Commenced".

5. Conventional production, **technically de-risked** through pilot-plant operation

- Proven flow sheet
- Fifteen years of technical de-risking
- Industrial-scale Heap Leach Demonstration Plant operated at site from 2015 validates flowsheet and key metallurgical parameters
- Demonstrated yellowcake production

6. Long track record of responsibility and sustainability

Environmental baseline monitoring since 2008

Peer reviewed, IFC compliant ESIA and management plans

2023 African Mining Indaba ESG Forum Award for Community Engagement

7. Delivering significant, lasting positive social and environmental impact

3.5 Mlbs U_3O_8
per annum,
enough to power
7-8 large nuclear
reactors

25 million tonnes
of coal displaced by our
production

64 million tonnes
of carbon emissions avoided
from nuclear power using
our uranium (if displacing
coal-fired power)

760 Namibian jobs
represents well-paid direct jobs and
a multiplier effect of up to
5,000 indirect jobs

**Based on Etango-8 assumptions*

Phased greenlight approach to Etango development

- ➔ Initial early works completed on time and on budget (access road and water pipeline)
- ➔ Detailed design works progressing
- ➔ Current contracts in progress at Etango: Bulk earthworks, internal access roads and construction power (running ahead of schedule)
- ➔ Finance and offtake workstreams progressing in parallel

Systematically de-risked through the uranium cycle

Unfolding uranium resurgence

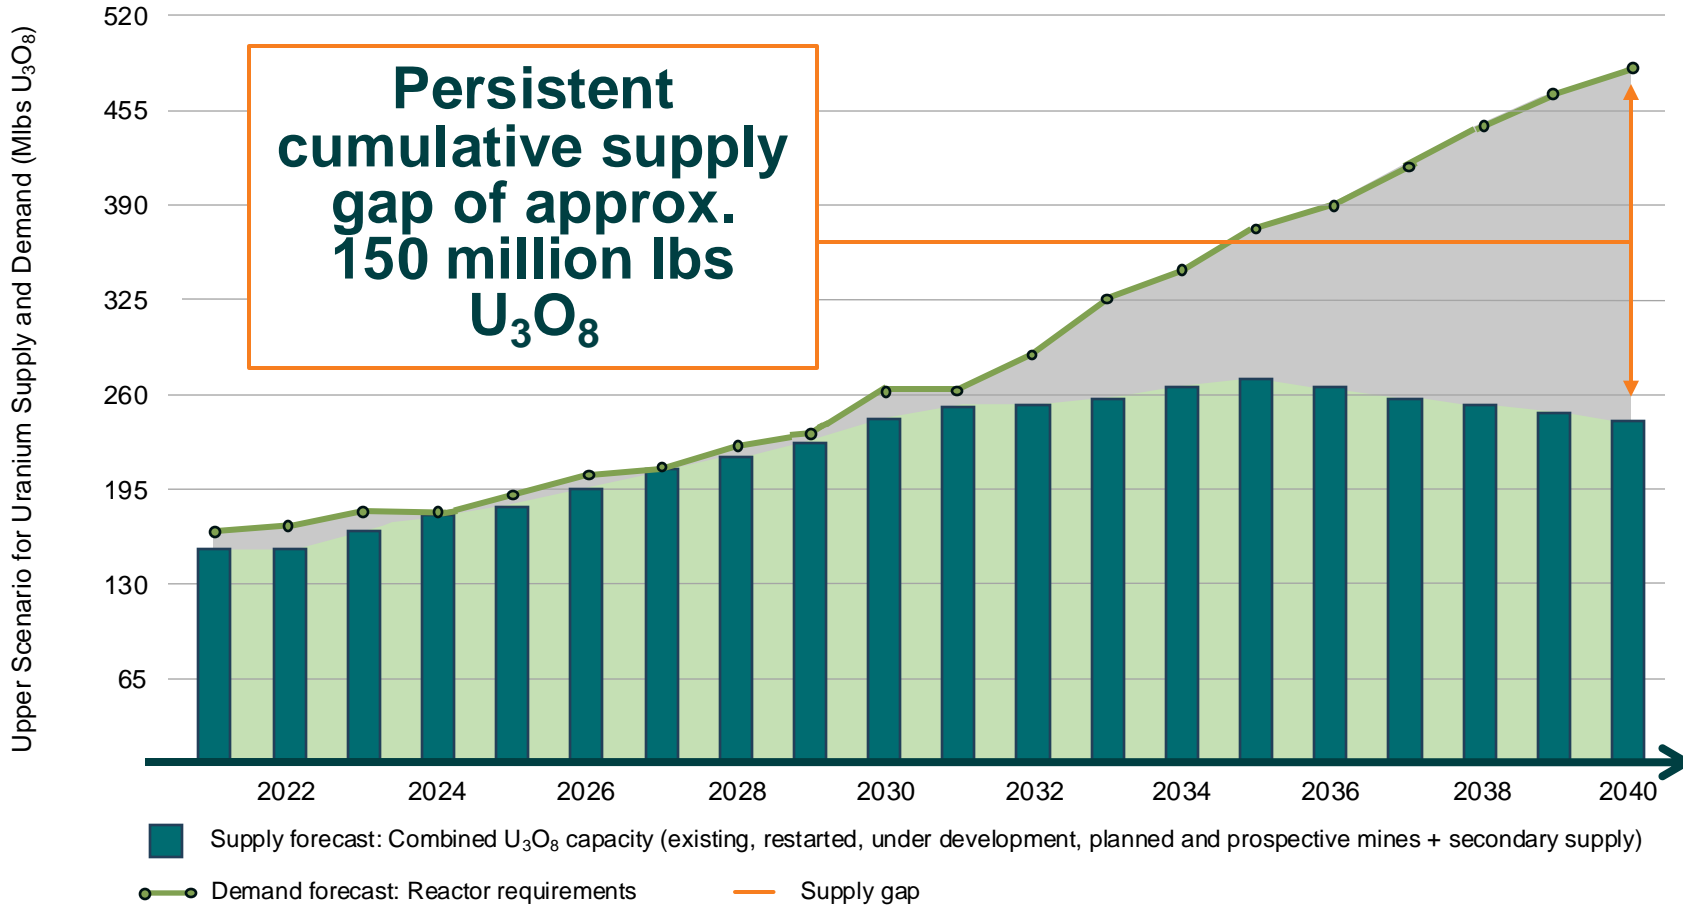

Etango-XP
Etango-XT
Scoping Study released

Etango-8
Mining Licence granted

Etango-8 DFS delivered

— Daily spot U₃O₈ price (US\$/lb): high US\$143/lb, low US\$18/lb

The uranium market resurgence is unfolding now

Utility contract demand building

- Rising confidence in medium and long-term global uranium demand growth picture
- Emerging Small Modular Reactor (SMR) technology driving further new demand additions

Fragile supply environment apparent

- Lost decade of uranium exploration and project development post Fukushima
- Producers struggling to match ramping demand, turning to tight spot market to fill gaps

Energy transition powering further growth

- National decarbonisation and zero emissions strategies rapidly building momentum globally
- Increasing government support for nuclear power as a “middle ground” baseload energy source

Etango-8 DFS and Etango-XP / XT Scoping Study

Incorporating completion of the Front-End Engineering and Design (FEED) and Control Budget Estimate (CBE) processes

| Total operating costs | US\$M | 1,993 | 2,019 | 2,045 | 4,047 | 4,093 | 4,140 | 4,271 | 4,317 | 4,363 |
| Project operating surplus | US\$M | 1,427 | 2,191 | 2,955 | 2,140 | 3,522 | 4,903 | 1,916 | 3,298 | 4,679 |
| Pre-production + expansion capex | US\$M | (353) | (353) | (353) | (721) | (721) | (721) | (353) | (353) | (353) |
| LOM sustaining capex | US\$M | (64) | (64) | (64) | (103) | (103) | (103) | (121) | (121) | (121) |
| Project net cashflow (pre-tax) | US\$M | 1,010 | 1,774 | 2,537 | 1,317 | 2,698 | 4,079 | 1,442 | 2,823 | 4,205 |
| Unit Cash Operating Costs | | | | | | | | | | |
| Total cash cost (excl. royalties/levies) | US\$/lb | 35.8 | 35.8 | 35.8 | 40.4 | 40.4 | 40.4 | 42.8 | 42.8 | 42.8 |
| Total cash operating cost (incl. royalties/levies) | US\$/lb | 37.9 | 38.4 | 38.9 | 42.5 | 43.0 | 43.5 | 44.9 | 45.4 | 45.8 |
| All-in-sustaining-cost (AISC) | US\$/lb | 39.1 | 39.6 | 40.1 | 43.6 | 44.1 | 44.6 | 46.1 | 46.6 | 47.1 |

^ 5.9 Mlbs pa is LOM average Etango-XP output and 6.7 Mlbs pa is average Etango-XP output post expansion completion (after Year 5)

For full details of the Etango-8 DFS and Etango-XP / XT Scoping Study, please refer to ASX releases dated 6 December 2022, "Etango-8 Definitive-Feasibility Study" and 18 March 2024, "Etango-XP and Etango-XT Scoping Study". In addition, please refer to ASX release dated 11 June 2024, "Etango-8 FEED Complete and Costs Updated; Detailed Design Commenced". Other than the updated capital and operating costs expressed in the 11 June 2024 release, Bannerman confirms that it is not aware of any new information or data that materially affects the information included in the releases of 6 December 2022 and 18 March 2024. All material assumptions and technical parameters underpinning the estimates in those ASX releases continue to apply and have not materially changed.
